Xbrand 360° Universal Docking Stand

Combination universal docking station and ergonomic laptop stand

WHY TO BUY

- **universal** – works will all laptops running 98SE, ME, 2000, XP, XP Pro and even Vista
- **superior value & features** – includes docking, improved comfort via proper screen height positioning, desk space savings, enhanced laptop cooling, 360º swivel … all for the price of a typical port replicator or docking station
- **it's just plain cool** – stunning, award winning design functions as good as it looks

FAQ

How does the dock connect to the laptop?

The connection from the Dock to the laptop is made with a high speed USB 2.0 link cable – it's included with the product.

How do you type on the laptop when it's docked?

Simple. You don't. The Dock is designed for use with an external keyboard and mouse. You can plug them into any of the Dock's 4 USB 2.0 ports.

Will it hold a 17'' laptop?

The basic answer is, YES. The Dock is engineered to hold more than 30 lbs of weight. In general if the laptop is less than 1.75'' thick it should be just fine when placed in the Dock.

Why doesn't it have a VGA (monitor) port?

Today's laptop screens are big, bright & have great resolutions. By raising your laptop's display to eye-level the Dock eliminates the need to purchase and use an external monitor.
